

#### △ About Us

Riwatt Solar Co.,Ltd is a premier manufacturer of the world's finest maintenance free solar water heater to the public at very competitive prices, with an emphasis on professional innovation and quality, we have always put an emphasis on conducting business in an ethical, responsible, clear, and ecological way.

Riwatt value Innovation, Dedication and Superiority, and satisfy our customers by providing high-tech designs and features solar thermal products according to customers' needs. Improving the quality continuously and innovating forever. Our products have been approved by plenty of customers whom from around the world like America, Europe, Middle East, Asia and Australia.

Riwatt will incessantly offer noteworthy high quality solar thermal energy and professional service with the deep technical accumulation, reasonable human resource and farsighted strategy. We sincerely welcome you contact with us and do the mutual benefit business with each other in the near future!

PIOEER-30	58mm	1800mm	30	0.42	67	138	162

Model	PIOEER-15/18/20/24/30
Manifold header pipe material	TP2 copper
Outer shell material of manifold	Anodized aluminum alloy
Frame	Stronger GALVANIZED STEEL 1.5mm,45 ° flat roof or slope roof.
Heat pipe	Pure cooper & lead free, condenser:Ø14mm,body:Ø70mm
Insulation layer	High density rock wool
Rubber Seals and rubber Rings	HTV grade silicone rubber
Maximum Operating Pressure	12 bar (175 psi)
Vacuum tube	Glass vacuum tube with anti-frozen copper heat pipe
Tube structure	All-glass double deck co-axial structure
Tube dimension:	58*1800mm×15/18/20/24/30 tubes
Manifold Plumbing Connections	22mm transfer to 3/4"
Stagnation Temperature	Approx. 230°C (446°F)
Daily efficiency	~55% (~42% in winter)
Hailstone resistance	Diameters of less than 25mm (1 inch)
Heat pipe anti-freezing	-37°C (-98.6°F)
Life span	Approximate to 15~25 years

expansion vessel accessories	Expansion Vessel Accessories	-	-

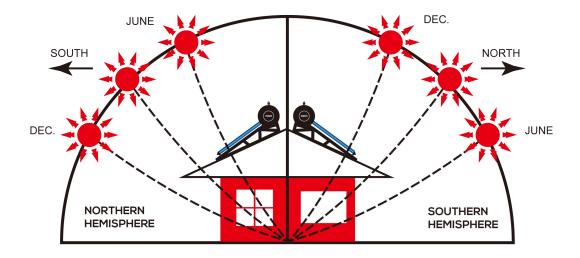

#### Portable Demo Solar Kits.

#### Mounting Surfaces and Direction:

Solar system can be installed on a flat roof or a tiled roof with maintaining the proper angles and directions.

Naturally you want the collector to receive the maximum amount of sunlight each day and throughout the year. As a general rule if you are in the Northern Hemisphere then the collector should face south and if you are in the Southern Hemisphere then the collector should face north. See diagram below.

You do not have to be too careful about mounting the collector at the exact angle suggested. If your roof angle is within 10o+/- of your desired angle you can just mount the solar collector flush against the roof surface. The added trouble of adjusting the collector to a precise angle is not warranted as it will not result in a great improvement in efficiency.

#### **Transaction Terms:**

- 1. Payment term: 30% TT in advance or L/C (NEGOTIABLE), for sample order, LCL P.O, 100% TT in advance.
- 2. Delivery: ±13 working days after the receipt of deposit.
- 3. Warranty:

The manufacturer covers failure due to manufacturing defects for the following warranty time periods.

Collector Manifold Warranty: 7 (SEVEN)Years | Evacuated Tubes Warranty: 15 (FIFTEEN) Years

Stainless Steel Tank Warranty: 7 (SEVEN)Years | Warranty of Other System Components: 1 (ONE) Year
